

McGill Maintenance & Fabrication

a local company providing world-class services

By Titan EPCOM

Founded in October of 1962, McGill Maintenance & Fabrication is a mechanical maintenance contractor specializing in rotating and reciprocating equipment, including but not limited to pumps, turbines, compressors, gearboxes, fans, and blowers.

Our customers include industries from refineries, petrochemical companies, marine and offshore services to commercial businesses where we are called on to handle everything from simple repair work to complete rebuilding of their rotating and reciprocating equipment.

Our Services:

- **Mechanical maintenance specializing in rotating and reciprocating equipment**
- **Providing industrial maintenance services**
- **Climate-Controlled Machine Shop and Assembly Shop**
- **Welding, Fabrication and Coatings services**
- **Field Services**
- **Hose Testing Services**
- **Marine Services**
